2018-04-10 Juana Martinez-Neal A 2019 Caldecott Honor Book What's in a name? For one little girl, her very long name tells the vibrant story of where she came from — and who she may one day be. If you ask her, Alma Sofia Esperanza José Pura Candela has way too many names: six! How did such a small person wind up with such a large name? Alma turns to Daddy for an answer and learns of Sofia, the grandmother who loved books and flowers; Esperanza, the great-grandmother who longed to travel; José, the grandfather who was an artist; and other namesakes, too. As she hears the story of her name, Alma starts to think it might be a perfect fit after all — and realizes that she will one day have her own story to tell. In her author-illustrator debut, Juana Martinez-Neal opens a treasure box of discovery for children who may be curious about their own origin stories or names.

2012-06-21 Patricia Murphy This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners, and to be reflexive about their own practices and contexts. Learning involves a transformation of identity which occurs through negotiation and repositioning, through new ways of relating, and through different ways of participating in practices. This book examines the meaning and implications for pedagogy in educational and workplace settings, and the role of the teacher in this sociocultural view of learning. By illustrating the mediated nature of agency and identity, the chapters (re)conceptualise the teacher and the learner and show different ways of supporting learning and being a teacher. The settings represented range from nursery to university and from out-of-school to institutionally-based and work place situations. Curricular aspects represented include popular culture, critical literacy, multimodality, the arts, and new technologies. Teachers and student teachers, as learners, are also represented in the accounts assembled. The book takes a sociocultural view of learning and considers the pedagogical implications of this view. It explores different meanings of pedagogy and considers notions of cultural bridging and the process of transforming identities. The contributions challenge ways of thinking about practice, both teaching and assessment, and argue for practices that bridge between learners' worlds, their communities and educational institutions. Drawing on the international literature, this book will be essential reading for students of curriculum learning and assessment in all sectors from pre-primary to further and higher education. It is suitable as a core text for masters and taught doctorate programmes. It will also be of interest to a wide range of professionals involved with curriculum, learning and the practice of teaching and assessment. This book is relevant to those in work-based and professional education and training, and in informal educational settings, as well as traditional educational institutions at all levels. A unique collection in a field that is underrepresented, it will also be of interest to an academic audience.

2015-10-29 Andy Cope On a good day, being a primary school teacher is the best job in the world. However, in the interests of grounding The Art of Being a Brilliant Primary Teacher in pure realism, Andy Cope and Stuart Spendlow readily acknowledge that it can also be the worst. The purpose of this book is to help you have more amazing days by inspiring and challenging you to be the best version of you because, at your best, you're flippin' awesome! Embrace the power of positive psychology, lift your happiness levels, discover tips and tricks to enhance your practice and get ready for some seriously brilliant primary teaching with this innovative, practical and positive guide. 2016-05-01 David Horton The highly popular AIATSIS map of Indigenous Australia is now available in a compact, portable A3 size. Available flat or folded (packaged in a handy cellophane bag) it s the perfect take-home product for tourists and anyone interested in the diversity of our first nations peoples. The handy desk size also makes it an ideal resource for individual student use. For tens of thousands of years, the First Australians have occupied this continent as many different nations with diverse cultural relationships linking them to their own particular lands. The ancestral creative beings left languages on country, along with the first peoples and their cultures. More than 200 distinct languages, and countless dialects of them, were in use when European colonization began. While people in some communities continue to speak their own languages, many others are seeking to record and revive threatened ones. Aboriginal and Torres Strait Islander peoples retain their connection to their traditional lands regardless of where they live. Using published resources available from 1988-1994, the map represents the remarkable diversity of language or nation groups of the Aboriginal and Torres Strait Islander peoples of Australia. The map was produced before native title legislation and is not suitable for use in native title or other land claims."
